

Shouldn't managing your telecom environment be this simple?

It Can. . .

Running a successful company is based on the ability to communicate and minimize operating costs. Perhaps when you were young, the tin can telephones worked just fine. Times have changed. . .

The Telecom Act of 1996 has fueled the explosion of services, providers, technologies, bundling and platforms for internet, wireless, data, local access and long distance services.

The way we communicate today has changed dramatically, and so has the telecommunications industry. Why would you base important business decisions about telecom issues on guesses, averages, or meaningless abstractions?

Intelligent Bills has perfected an approach that will help you gain a clear understanding of your business requirements and standards. Each step in this process defines and optimizes your savings. We accomplish this by using a proven process and state of the art technology. When it comes to strategic telecommunications sourcing, compliance, optimization, and expense management - one company stands alone - Intelligent Bills.

**INTELLIGENT
BILLS**

Total Telecom Cost Management

THE INTELLIGENT BILLS DIFFERENCE

SOLUTIONS

Intelligent Bills is a professional services firm focused on helping its clients draft, develop and implement Telecom Cost Management Solutions.

Our focus on telecom inventory and invoice management, enables our customers to gain better control of their inventory, increased visibility into business intelligence and a reduction in communication costs. Beginning with billing dispute management to automated allocation of charges, Intelligent Bills enables our clients to optimally manage the complex and changing lifecycle of telecom costs.

For the last thirteen years, our team of subject matter experts have successfully delivered flexible telecom solutions through Billing Compliance, Inventory Reconciliation, Professional Services and Telecom Expense Management with an average annualized savings of 30% or more.

Experience the Difference

Our company's mission is to deliver significant reductions in network expenditures, lower operational costs and improve on process efficiencies.

Our consultants will walk you through a Free Evaluation on how our services can help improve on those processes, reduce your operating costs and show you a One, Two and Three Year Return On Investment with a Guarantee.

Our Free Evaluation will consist of:

- A Market Rates Comparison
- Benchmark Your Current Process and Procedures against Industry Trends
- Billing Compliance Determination (Potential Opportunity)
- Billing Optimization (Potential Opportunity)
- Three Year Return On Investment Report

Invoice Data Capture

This managed service completely automates invoices and paper documents by capturing the detail for validation and complete, accurate digital transformation of the paper media. This state of the art technology affords us the ability to be the only 100% paperless cost management solution in the industry.

Billing Compliance

This no cost offering complements the Telecom Expense Management service by identifying, correcting, and recovering money from billing errors. This is accomplished through a validation of charges or assets, against published tariffs, contract compliance, and physical inventory reviews. Our clients realize immediate savings within 30 Days.

Inventory Reconciliation Services

This service offering is designed to manage all Telecom and IT infrastructures by establishing and maintaining a single inventory database of network services derived from billing. Intelligent Bills will validate that all billing and service changes are accurately reflected and billed correctly. Thereby keeping the integrity of the inventory information close to 99.9% accurate.

Telecom Expense Management

This service is a comprehensive cost management platform for your corporate voice, data and wireless spend. Our offering empowers your organization with greater ability to track, manage, and validate your expenses by leveraging our invoice processing services and feature rich application to achieve Savings, Visibility, and Control.

Professional Services

Our experienced team of subject matter experts specialize in assessing the infrastructure and business process needs from procurement to payment. Intelligent Bills' professionals implement measurable solutions that improve productivity and deliver savings. Through our modifiable delivery approach, our clients have achieved cost savings of 25-45% through use of our telecom sourcing services by improving in efficiencies and reducing the duration of their projects.

Customer Advantage Program (CAP)

Our clients subscription affords them the ability to participate in a pass through program that helps you obtain wholesale pricing with nationwide service providers for all traditional voice, data, and internet products.
