

IntelligentBills

Telecom & Technology Services

Intelligent Bills has been facilitating client requirements and finding solutions for domestic and international vendors for 30+ years. Our vendor partnerships give our customers the best in class support. Our subject matter experts are on call to address issues and take the guesswork and frustration out of procurement. We are a powerhouse behind your efforts to source, install and implement best of breed technologies that help you save and grow.

CCAAS

Contact Center as a Service (CCaaS) is a cloud-based customer solution that allows you to leverage a contact center provider's software. CCaaS lets you implement only the features you need while remaining agile in scaling up or down, based on your needs.

CLOUD

Demand for cloud-based solutions continues to grow as popular business applications move to the cloud. Present your customers with services focused on their cloud-based business needs from data storage and security to disaster recovery and co-location.

DATA

Business moves fast and customers depend on the reliable Internet. Offer high-speed DSL, fiber, or satellite services for small businesses or large enterprises. Connect customers with flexible solutions for more control and management of Internet costs.

MANAGED SERVICES

Give clients peace of mind knowing their IT is managed by experts. Help them spend less time on IT tasks and more time on their job. Even with limited resources you can have access to and choose from best-in-class providers.

MOBILITY SERVICES

Having a clear and complete understanding of the planning, sourcing, procurement, shipment, implementation, and management of mobility services can optimize the way your company functions.

SD-WAN

Breaking into the SD-WAN market or just trying to increase your book of business? Get everything you need to know, including definitions, case studies, and training to comprehensive ebooks and vendor comparison guides.

SECURITY

Cyber threats emerge every day,. Having security solutions in place to protect data is mission-critical. Ensure customers are prepared to fend off cyber-attacks like data breaches, DDoS attacks, phishing, etc. with our lineup of top-tier, industry-leading solutions.

VOICE/UCAAS

Give clients the reliable voice services they need to stay connected. Traditional phones, hosted voice or more advanced solutions, our providers offer efficient, cost-effective, scalable services to maintain vital communications.

700+

satisfied clients to date, serving most of the Fortune 1000.

100%

of our projects resulted in a positive impact on their Global IT/Telecom Spend.

\$1.8B

in total client recoveries, savings, and efficiency gains.

31+

years of experience across 21 industries.
